CARDI•OH
Ohio Cardiovascular and Diabetes Health Collaborative

Cardi-OH Update

The Ohio Cardiovascular & Diabetes Health Collaborative (Cardi-OH) is a statewide initiative of health care professionals who share knowledge to improve Medicaid patient outcomes and eliminate health disparities across Ohio.

Updated Clinical Guidelines for Diabetes

Outpatient Diabetes Management for Primary Care Providers: Medications Intensification and Algorithm

2022 Guidelines: Pharmacologic Management Algorithm

**Standards
of Medical Care**

Pearls for Clinical Practice

Simplified Prescription of Diabetes Technology and Medications

Did You Know?

The Ohio Department of Medicaid recently revised its Preferred Diabetic Supply List, based on the American Diabetes Association's updated Standards of Care.

Capsules provide busy clinicians brief summaries of best practices that are ready to be implemented in clinical care.

Cardi-OH

CAPSULE

Simplified Prescription of Diabetes Technology and Medications									
In Spring 2022, the Ohio Department of Medicaid (ODM) launched the Project ECHO program, a telemedicine-based approach to improve the management of chronic diseases in underserved communities. The program is designed to provide ongoing support and training to primary care providers in underserved areas, helping them to better manage their patients with chronic conditions. This approach is based on the principle of "telementoring," where experts provide guidance and support to primary care providers through video conferencing. The program is designed to be sustainable and scalable, allowing it to reach a large number of providers and patients across the state. While the program is still in its early stages, it has already shown promising results. Providers report increased confidence in their ability to manage chronic diseases, and patients report improved health outcomes. The program is expected to continue to grow and expand in the coming years.	Table 1. 2022 Ohio Medicaid Project ECHO Program: Overview of the Program <table border="1"> <thead> <tr> <th>Program Component</th><th>Details</th></tr> </thead> <tbody> <tr> <td>Program Goals</td><td>Improve the management of chronic diseases in underserved communities; Increase the number of providers participating in the program; Increase the number of patients receiving care through the program.</td></tr> <tr> <td>Program Structure</td><td>The program is structured around three main components: 1) Provider Training: Providers receive ongoing training and support through video conferencing. 2) Patient Support: Patients receive ongoing support and guidance from providers. 3) Data Collection: Data is collected on program outcomes and patient health status.</td></tr> <tr> <td>Program Impact</td><td>Providers report increased confidence in their ability to manage chronic diseases; Patients report improved health outcomes; The program is expected to continue to grow and expand in the coming years.</td></tr> </tbody> </table>	Program Component	Details	Program Goals	Improve the management of chronic diseases in underserved communities; Increase the number of providers participating in the program; Increase the number of patients receiving care through the program.
